

Apartments.com raises U.S. multifamily rent growth forecast

August 12, 2026

ARLINGTON, Va.--(BUSINESS WIRE)--Aug. 12, 2026-- U.S. multifamily vacancy has been revised downward, while rent growth projections have a stronger outlook, according to a new forecast from [Apartments.com](#), an industry-leading online marketplace of CoStar Group, Inc. (NASDAQ: CSGP).

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20260812284686/en/>

National multifamily vacancy is estimated to increase to 8.2% by the end of this year before easing to 8.1% at the end of 2027.

Stabilized vacancy is expected to remain flat through the end of the year, before rising modestly in early 2027 as the market continues to absorb excess inventory built up over the past two years.

Apartment rent growth is now expected to increase from 0.8% in the second quarter of 2026 to 1.4% in the third quarter, an upward revision of 70 basis points from [the previous forecast](#). The projected metric for the fourth quarter was also adjusted upward, from +0.5% to +1.9%.

"The near-term rent growth outlook reflects second-quarter rent trends slightly exceeding expectations," said Grant Montgomery, national director of multifamily analytics at CoStar Group. "The upward revision of second-half 2026 rent growth is driven by stronger employment assumptions and the significant progress made in the first half of the year in absorbing the excess inventory accumulated across 2024 and 2025, enabling market conditions to gradually tighten."

"The risks to the forecast appear balanced," said Montgomery. "Near-term employment growth expectations have improved since last quarter, reducing concerns that labor market weakness will significantly disrupt renter demand. However, elevated energy prices tied to ongoing conflict in the Middle East continue to erode household spending power and present a downside risk to apartment demand. Longer term, slower labor force growth could constrain employment gains and household formation. Offsetting these risks, the apartment sector continues to benefit from a structurally undersupplied housing market and a rapidly slowing construction pipeline, which could support stronger-than-expected occupancy and rent growth."

The full forecast can be found [here](#).
